

Pool of ideas

Diagnostic system of training needs in VET sector

Category

Lifelong learning, Training, New Technologies, Good practices

Target group

VET organizations, VET trainers, Unemployed persons

General description

The knowledge and training provided by VET organizations is of highly importance for a better society. Unfortunately, the training needs, especially of the unemployed are constant and can change rapidly. The VET organizations often do not have the time or the methodology to track these needs and develop respectively suitable training programs. This need can be even appeared to VET trainers. The project's aim is to solve these problems and furthermore to support the lifelong learning system .

Output

Diagnostic system of training needs in VET sector

Activities

1. Need analysis report – Determine the existing situation with regards to VET organizations, their needs and problems.
2. Training Diagnostic tool – It will be assess the training needs of the users (trainers and unemployed).
3. Training Platform – According to the recorded needs, each partner will develop training material for the most basic ones.
4. Good practices – Each partner will find successful application of the training platform by VET organizations and will write down its use.
